*Bottom rolling systems where weight of doors is carried on bottom track.

A comprehensive range of sliding door fittings for timber folding partitions either top hung or bottom rolling with end or centrally hung door leaves.

The door gears detailed in this catalogue, with the exception of Foldaside 210 and Foldaside 310, are not normally suitable for exterior openings as rebated heads and cills cannot be used. See separate catalogue for full range of exterior Foldaside and Cornaway Door Systems.

All standard Foldaside and Centafold hangers are of steel construction with ball bearings lubricated for life. Hangers and guides, except those used on Foldaside 210 and 310, are fitted to the top and edges of the door leaves and are therefore concealed when the partition is closed across the opening. In many instances opening widths are unlimited but individual door leaves are restricted to between 700 to 900mm wide on Foldaside end hung doors and between 700 to 1200mm wide on Centafold centre hung doors. With the Foldaside system, usually up to 8 leaves may be hinged together with the end leaf hinged to jamb. "Loose" or "floating" suites of door leaves are not recommended with interior Foldaside Door Gear except Foldaside 210 pages 24-25 and Foldaside 310 pages 26-27. With the Centafold system up to 7½ leaves may be hinged together with end half leaf hinged to jamb. "Loose" or "floating" suites of five or seven leaves may be used with top hung systems only. See the pages relating to the gear concerned for complete details of maximum sizes.

All performance recommendations apply to the gear only and specifiers and purchasers must satisfy themselves that the building structures are adequate for the door weights and will allow the specified working clearances to be maintained under all conditions. All loadings given are based on doors subjected to normal manual usage under normal conditions.

Complete folding partitions and sound reducing movable walls are also available from Hillaldam Coburn Limited on a supply and fix basis.

Top Track Brackets

DESIGN

Brackets have been designed to perform to all maximum carrying capacities shown in this catalogue under all normal conditions. For unusual and mechanically operated doors consult HILLALDAM COBURN.

MATERIALS

All brackets are either aluminium, forged or pressed steel.

JOINT AND END BRACKETS

The 100 type of side fixing brackets for all tracks have a detachable lock-joint kit to convert the ordinary plain bracket, and most types of brackets for 2-16, 3-20 and 3-25 tracks have detachable end plates which convert plain brackets to any hand of closed end.

SINGLE TRACK SIDE FIXING BRACKETS

- Type - 100 Open bracket.
- 051 Closed end piece to convert 2-100 & 3-100 open brackets to any hand of closed end.

Top Track Bracket Spacings

BRACKET SPACING FOR STANDARD LENGTHS OF 2-16, 3-20 AND 3-25 TRACK

Side or soffit fixing top track brackets are available for all top hung systems using tracks 2-16, 3-20 and 3-25 which must have track supporting brackets positioned at the centres shown.

With Foldaside 640 and Centafold 644 bottom rolling systems, the track is normally screwed direct to the timber soffit – see drawing details pages 13 and 23.

Closed end brackets should be fitted at the end of each track run and lock-joint brackets at each track joint. In addition, intermediate open brackets are required on each track length to maintain the bracket centres at a maximum of 900mm. The number of intermediate open brackets per track length are scheduled below.

- 1.8m Track length = 1 intermediate open bracket.
- 2.1m Track length = 2 intermediate open brackets.
- 2.4m Track length = 2 intermediate open brackets.
- 3.0m Track length = 3 intermediate open brackets.

All Foldaside and Centafold top hung systems require an extra bracket fitted where the concentrated weight of the folded doors is carried when in the open parked position.

BRACKET SPACINGS

FOR TRACKS 2-16, 3-20, 3-25
CLOSED END PLATES ARE SENT SEPARATELY
AND CAN BE ASSEMBLED EITHER HAND.

FOR TRACKS 2-16 AND 3-20 TYPE 100 SIDE WALL
BRACKETS THE LOCK JOINT DEVICE IS ALSO SUPPLIED
AS A KIT AND IS ASSEMBLED TO A PLAIN BRACKET.

EXTRA BRACKETS ARE NECESSARY WHERE A
CONCENTRATED WEIGHT OF FOLDED DOORS IS CARRIED.

ADDITIONAL BRACKETS MAY BE NECESSARY WITH
HEAVIEST GEARS REFER TO APPROPRIATE DRAWING.

Foldaside 100 Sliding Door Systems

FOR INTERIOR END HUNG FOLDING DOORS USING EQUAL WIDTH DOOR LEAVES

APPLICATION

Top hung, end folding, light weight interior residential and commercial doors with concealed fixing for hangers and pivots.

RANGE

Maximum leaf weight 27kg (60lbs)

Maximum leaf height 2.5m

Maximum leaf width 600mm

Leaf thickness between 20 to 40mm. Swing leaves may not be used. Up to 4 leaves may be hinged together with end leaf pivoted adjacent to jamb. In situations where a greater degree of stability is required, bottom guiding with floor channel should be used. For door leaves over 450mm wide and/or over 15kg in weight, bottom guiding must be employed, minimum leaf thickness 30mm.

DOOR CONSTRUCTION

Solid blockboard, louvred or flush panelled construction with adequate provision for fixing end pivots and hangers.

TRACK

1-12 (1.2mm) Galvanised steel to BS EN 10142. Drilled for brackets or soffit fixing. Lengths 1.5m to 3.0m. Extruded aluminium track available as an optional extra.

TRACK BRACKETS

1-100 Steel, side fixing with two screws.

HANGERS

1-246 Steel construction. 4 nylon wheels, ball bearings lubricated for life. Vertical adjustment.

HINGES

95-521 Steel, plated finish. Surface mounted. 3 per joint for doors up to 2.1m high. 4 per joint recommended for higher doors.

TOP AND BOTTOM PIVOTS

95-508 Pressed steel top housing, clamp fixing in track. Spring loaded pivot fixed to top edge of door. Bottom pivot and housing, pressed steel with nylon socket slide. Vertical and lateral adjustment.

DOOR GUIDE

41-346 Steel plate, nylon swivel.

FLOOR CHANNEL

41-2 aluminium. Drilled and countersunk for woodscrew fixing. Lengths 1.5m to 3.0m.

FURNITURE

A range of furniture is shown on page 5.

FINISHES

Top track galvanised. Hangers, brackets, guides and pivots zinc plated. Furniture usually satin anodised.

Foldaside 240 Sliding & Folding Door Systems

FOR TOP HUNG FOLDING PARTITIONS

APPLICATION

Top hung, light duty, internal folding doors with concealed fittings. For residential applications, etc.

RANGE

Maximum door weight 36kg (80lb)
Maximum door height 2.4m (8ft)
Maximum opening width 12.8m (42ft)
Maximum door leaf width 800mm (2ft 8in)

Up to 8 leaves may be hinged together. Loose or floating suites of door leaves are not recommended, alternatively use Foldaside 210 pages 24-25.

DOOR CONSTRUCTION

Door thickness 35 to 44mm. Width of door leaves vary according to arrangements; refer to drawings for details. Rebating to suit hanger aprons is shown. Swing leaves are best hinged to jambs. When hinged to folding suites reduce door leaf widths to 700mm and use four wheel hangers adjoining 'swinger'. Always engage holdback catch before operating.

FIXING

Track brackets usually soffit fixed. Universal soffit bracket designed for ease of fixing and versatility. Additional brackets required where doors fold. All hangers have vertical adjustment.

Floor channel unnecessary under swing leaves.

HANGERS

All steel, ball bearing lubricated for life. 2-240 with two wheels. 2-241 with four wheels.

TRACK

2-16 (1.6mm) Galvanised steel to BS EN 10142. Standard Lengths 1.8m to 3.0m.

TRACK BRACKETS

Steel. See drawing and range on page 3.

DOOR GUIDES

41-340 Steel angle plate fits rebate of door. Nylon swivel.

FLOOR CHANNEL

41-2 Aluminium. Drilled and countersunk for timber. Lengths 1.8m to 3.0m.

FOLDASIDE BUTT HINGES

95-520 Steel, size 75 x 50mm. 95-541 Aluminium, anodised with stainless washers and pins, size 75 x 50mm. All specially drilled.

JAMB PIVOTS

95-518 Steel and brass jamb pivot set. For use with all equal width leaves.

FURNITURE

A range of furniture is shown on page 5.

FINISHES

Top track galvanised. Aprons, brackets and pivots, zinc plated. Furniture usually satin anodised.

BOLTS AND SCREWS

Included with all fittings except track brackets.

SPECIAL NOTE: When Jamb pivots are replaced by hinges, particular attention should be paid by the joiner to leaf sizes and the use of Dimension A or B as shown on the opposite page.
